

## KOLA

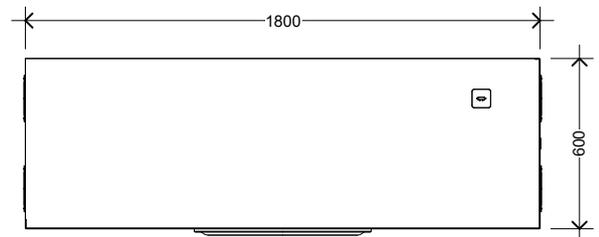

Kola is the deepest hole on earth and a fitting description of this ultra-low subwoofer. Kola is a 24" infrasonic subwoofer capable of playing down to 5Hz with 80mm 2-way X-Max linear travel. The Kola subwoofer is a custom engineered box specifically designed to increase its frequency response into the infrasonic region. This subwoofer will connect with rooms up to 10m long to provide room gain or two subwoofers can be combined to provide room gain in any room size. In most circumstances two Kolas will provide enough power to provide infrasonic base down to 10Hz at 120dB. The Kola driver weighs in at almost 65kg. A pair of these properly setup in most cinema rooms will produce a frequency response between 5-200Hz.

All Elementi subwoofer are fully digital and benefit from floating 32 point DSP processing, digital crossovers, look forward speaker protection, high flow amplifiers and high quality D/A converters. All amplifiers are specified with 3dB of headroom at maximum output to ensure there is no clipping or general distortion. Each speaker is custom tested and run in to ensure optimal performance out of the box.

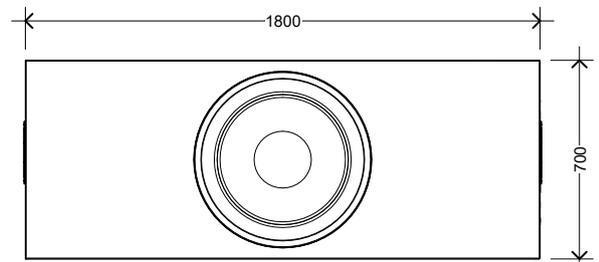

## SPECIFICATIONS

DESCRIPTION:	Floor Mounted
USE:	Rubber Feet and Handles
ROOM GAIN:	Rooms up to 10m long
FS:	16.2Hz
DRIVER:	24"
X-MAX ONE WAY LINEAR TRAVEL:	40mm
AMPLIFICATION:	3000W continuous
FREQUENCY RANGE:	5-200Hz
CONTINUOUS/PEAK OUTPUT @1m:	127dB / 130dB
VOICE COIL:	Dual
IMPEDANCE:	4 Ohms
DIMENSIONS:	W:1800 x D:600 x H:700mm
WEIGHT:	130kg
